

# HOW ARE ONE TAM PROGRAMS & PROJECTS ACCOMPLISHED?

1. Mt. Tam is managed by four different land management agencies.

2. Each agency develops its own plans, programs, and projects through a public engagement process that is consistent with their applicable laws, policies, and governance (NEPA, CEQA, public board meetings, etc.)

AGENCY-LED DECISIONS WITH PUBLIC INVOLVEMENT

3. Some programs and projects cross agency boundaries and offer opportunities for additional public support.

4. Therefore, these collective agency aspirations (to ensure the long-term care of Mt. Tam) may be put forward for support through the Tamalpais Lands Collaborative (TLC).

COLLECTIVE ASPIRATIONS

5. The TLC Working Group develops an annual work plan that addresses implementation, fundraising, and volunteer engagement. This work plan is approved by agency executives and elected boards.

6. However, care of Mt. Tam is ultimately accomplished with your help through One Tam.
